The aim of the day was to get the LCPs to start thinking about what actions they want to undertake as part of the programme.</li><li>2. Data: purpose was to help LCPs identify some interventions for their areas to address issues highlighted by the data.  Frailty data was presented to show no. of mild/moderate and severe frail in different areas. Also information on breakdown of 36 deficits within the eFI.  Contacts in different areas and also for frail person vs average.</li><li>3. There was discussion about how the third sector can support change, and a recognition that they are already working in some areas, but so far this doesn't seem to be reflected in the action planning which is quite clinical.</li></ol>
