

Long Term Conditions Steering Group, 8 April 2019

Meeting Details	Name of Meeting: Long Term Conditions Steering Group Date of Meeting: 8 April 2019 Third Sector Representative: Iain Anderson
Key Issues / Themes / Messages	<p>Aims of the Group: Cross-sector representation with the aim of ensuring greater consistency in support and treatment of people living with Long Term conditions. The group members will share learning and consider most effective approaches to workforce development, use of digital technology, and alignment of activity where there are opportunities (e.g. linking physical and mental health comorbidities).</p> <p>The Group has oversight of a specific work programme focusing on; people living with respiratory conditions (in particular addressing health inequalities and vulnerable groups), people at risk of or living with diabetes, and people living with cardiovascular disease.</p> <p>Population Health Management – update: Further analysis of long-term conditions (ltc) underway as part of the PHM project with the potential for greater potential segmentation including focusing on single ltc's, the most regularly occurring combinations, and pathways for treatment/care.</p>
