Objective of the research:

This research is interested in **your** experiences and understandings of hate and hate crime. I would like to hear about how these **experiences** impact your sense of **identity**. I am also interested to hear about how you **manage** and/or **respond** to hate and hate crime. Your experiences are **crucial** to gaining a better understanding of hate crime and how to tackle it.

What is Involved in the Research?

Your participation in the research would include two workshops one at the beginning of the research and one at the end. This is to explore the meaning of hate crime as an informal group discussion.

There is also the opportunity to get involved with interviews, one to one with the researcher.
